

VAIBHAV TUKARAM SUTAR

sutarvaibhav4518@gmail.com | github.com/Clutchbeast15 | www.linkedin.com/in/sutar-vaibhav

Professional Summary

Aspiring smart contract auditor with hands-on experience performing shadow audits on real-world DeFi protocols. Skilled in identifying vulnerabilities and writing structured security reports. Actively learning new attack vectors with a strong interest in EVM internals, smart contract auditing, blockchain security, and mathematics.

Technical Skills

- **Languages & Frameworks:** Solidity, Foundry
 - **Auditing Tools:** Slither, Aderyn, Solidity Visual Developer, Solidity Metrics.
 - **Other Skills:** git and github, Technical report writing, VS Code.
-

Experience

- Secudoku Shadow Audits

Performed shadow audits on 3 real-world projects on the Secudoku platform, uncovering 25 security issues and achieving a **#2 leaderboard ranking**.

- Cyfrin Updraft Security Course

Received hands-on smart contract security training focused on Solidity, EVM fundamentals, and auditing techniques using Foundry. Practiced writing vulnerability findings, severity classifications, and PoCs, strengthening understanding of common smart contract vulnerabilities.

- Local CTF Challenges

Solved **15+ Ethernaut levels** (documented on GitHub) and additional blockchain security CTFs. Improved exploit development and vulnerability analysis skills.

Certifications

- Smart Contract Security by Cyfrin Updraft
 - Solidity Smart Contract Development by Cyfrin Updraft
 - Blockchain Basics by Chainlink
-

Education

- Bachelor of Engineering (B.E) in Electronics and Telecommunication (Mumbai University)
